Transforming Agriculture Through Science, Sustainability and Innovation

AGRICULTURE PROGRAM

Agriculture is not just about farming. It is about science, sustainability, food security, and innovation that drives the future of the global economy.

WHY CHOOSE AGRICULTURE ?

- Expanding Global Agriculture and Food Industry
- Diverse Careers in Agribusiness, Research and Development
- Opportunities in Sustainable Farming and Agri Innovation
- Rising Demand for Skilled Agriculture Professionals

LEARN THE SCIENCE OF AGRICULTURE WITH HANDS-ON TRAINING
IN MODERN FARMING PRACTICES AND AGRICULTURAL RESEARCH.

B.Sc Agriculture

The Bachelor of Science in Agriculture (B.S.C. in agriculture) program is a comprehensive 4 year undergraduate journey designed to develop skilled agricultural professionals who drive sustainable farming, food security, and rural development. The program integrates scientific knowledge with field based practices, preparing students to address modern agricultural challenges through innovation, research, and technology.

Focus: Crop science, soil management, modern farming technologies, agribusiness development, and sustainable agricultural practices.

In Campus Agricultural Infrastructure

- Dedicated agricultural experimental land within the campus designed for real time field research, crop experimentation, and sustainable farming practices.
- State of the art agricultural laboratories equipped with advanced tools and modern scientific instruments to facilitate precision learning and innovation.
- A specialized Agronomy Laboratory focused on crop science, soil management, and next generation agricultural techniques.
